

DineSum

Team: 0xFFFFFFFF

Uday Alla, Stanley Hsu, Susan Krkasharian,
Karen Li, Matthew Wong

Motivation

- Some places don't accept online or phone reservations
 - Instead, you have to be there in person to make a reservation
- What if you could make requests for “reservations”
 - Post restaurant, time, party name, party size
 - Offer small payment for small favor
- Make pre-dining experience less stressful

Overview

- Crowdsourced Android Application
- Make requests for “reservations” that others can fulfill
- Claim requests from others for a small payment

Usage Scenarios

- A group of students going to a popular Korean BBQ restaurant that does not take a reservation on a Friday night
- A group of friends killing time waiting for their seat at a dimsum place
- A student who lives in Sawtelle by a ramen place wanting to make some easy money during the evening

Features

- New Request Creation Page
- Sent Requests Page
- Claimed Requests Page
- Nearby Pending Requests Feed
- User Points System
- Real-time Firebase Database
